

Nguyen Minh Chi

Hanoi, Vietnam • minhchi1804@gmail.com • +84 586 861 740 • LinkedIn • GitHub

AI engineer focused on LLM applications, RAG systems, and agentic workflows, with experience fine-tuning multilingual models, building retrieval pipelines, and deploying production document-AI services. Interested in low-resource NLP, efficient inference, and robust AI systems for multilingual and resource-constrained settings.

Education

Ton Duc Thang University

Bachelor of Computer Science

GPA: 8.31 / 10

Ho Chi Minh City, Vietnam

Oct 2020 - Oct 2024

Relevant Coursework: Machine Learning, Deep Learning, Natural Language Processing, Big Data, Digital Image Processing, Data Structures & Algorithms, **Probability & Statistics, Linear Algebra, Calculus**

Professional Experience

VinBigData

AI Engineer

Hanoi, Vietnam

Jul 2025 – May 2026

- Earned placement in the highly competitive **AI Engineer Training Program** (top 8% of 900+ applicants).
- Worked across two research-oriented project rotations: a production conversational AI system (intent classification, dialogue state management) and a ground-up multi-agent orchestration framework for enterprise workflow automation.

IMT Solutions

AI Engineer

Ho Chi Minh City, Vietnam

Jun 2024 – Jul 2025

- Built and maintained an internal RAG chatbot for company-wide knowledge access, covering retrieval design, grounding quality, and production serving.
- Containerized document-processing services with FastAPI and Docker, applying Qwen2.5-VL and YOLO for structured extraction and layout analysis from scanned documents.
- Built scalable ETL workflows with Apache Airflow and PySpark for automated data orchestration.

FPT Software

Data Scientist Intern

Ho Chi Minh City, Vietnam

Mar 2024 – Jun 2024

- Fine-tuned encoder-only transformer models (BERT, RoBERTa) on labeled Vietnamese datasets for comment classification.
- Built an end-to-end text classification pipeline covering preprocessing, feature engineering, and model evaluation.

Projects

Agentic RAG Legal QA System

Jun 2025 – Oct 2025

- Architected a **dual-layer RAG system** for Vietnamese legal QA with structure-aware chunking, metadata-enriched retrieval, and procedural templates for multi-step statutory queries.
- Fine-tuned **Llama 3 8B** and **Mistral 7B** with **QLoRA (4-bit quantization)** on curated Vietnamese legal Q&A data to improve grounding and citation behavior in internal evaluation.
- Built a **multi-agent pipeline** for routing, retrieval, guardrails, validation, and caching; benchmarked it against a single-step RAG baseline and analyzed cross-document errors.

Intelligent Document Processing (IDP) Pipeline

Jan 2025 – Jun 2025

- Designed an **async FastAPI service** that parallelized OCR and LLM inference, reducing end-to-end latency by **~70%** on multi-page documents.
- Built a **hybrid routing layer** across **Qwen2.5-VL**, YOLO layout detection, and OCR engines to select backends by layout complexity, cost, and extraction uncertainty.
- Deployed a production pipeline processing **2,000+ invoices/day** (up to **5,000+ peak**), achieving **>95% field-level accuracy** with **<7 s/page** latency.

Technical & AI Skills

- **NLP & RAG Research:** Low-resource NLP, corpus curation, retrieval evaluation, error analysis, multilingual model fine-tuning
- **Agent Frameworks & Orchestration:** LangGraph, LangChain, LlamaIndex, DSPy, Mem0, n8n
- **Programming Languages:** Python, SQL, JavaScript, Java
- **Deep Learning & LLMs:** PyTorch, TensorFlow, Hugging Face Transformers, vLLM
- **Multimodal Models:** Qwen model family, vision-language integration
- **MLOps & Production:** GCP, Docker, Kubernetes, Airflow, MLflow
- **Databases & Storage:** PostgreSQL, MongoDB, Redis, ChromaDB, Qdrant, Milvus

Awards & Achievements

- **Third Prize & National Semifinalist** – University Research & Eureka Competitions (2024)
For *AI-Powered Mental Health Counseling System*.
- **Promising Innovation Award** – VietFuture Innovation & Entrepreneurship (2024)
For *LegalMind*, an AI platform for legal precedent retrieval, case comparison, and court judgment drafting optimization.
- **Merit Award** – MakeCode Arcade Game Design (2022)

Certifications

- IELTS 7.0 (2026)
- Deep Learning Specialization (Coursera, 2023)
- Natural Language Processing Specialization (Coursera, 2023)
- TensorFlow Developer Professional Certificate (2023)
- Generative AI with Large Language Models (DeepLearning.AI, 2024)
